SILENT TRAVEL KITS

RECOMMENDED BY EDDIE THOMAS

INTERIOR SILENT TRAVEL

QUIETER Modern cars, especially, need extra sound-proofing. That's why Interior Silent Travel makes such a difference to modern cars, large or small. Engine, transmission and road noise are deadened. Specially designed, very heavy, thick, sound insulation material, seals off sound at noise centres and gives amazingly quiet driving.

MORE COMFORTABLE Mile after mile you enjoy the quiet luxury of a really expensive car. With Interior Silent Travel your car is quieter, warmer in winter, cooler in summer, has a deep, luxurious feel under the carpets. Interior Silent Travel is ESSENTIAL for comfortable driving over long distances.

SAFER Noise is a major cause of driver-fatigue. But Interior Silent Travel deadens noise right down - gives tireless, fatigue-free driving at all times. Makes all the difference on long, tiring holiday drives.

KITS OF PRECISION CUT SOUND DEADENING MATERIAL READY TO FIT. COMPLETE WITH STEP BY STEP INSTRUCTIONS, ADHESIVE AND A BRUSH TO APPLY IT. FITTED IN ONE TO THREE HOURS AT HOME. NO MECHANICAL ALTERATIONS. NO SPECIAL TOOLS.

Experienced motorists recognize tyre wear as the price of high-speed cornering, fierce braking and violent acceleration. Every motor car is capable of being cornered at speeds which in seconds can far outstrip the life of a normal tyre.

The Pirelli Cinturato* tyre was developed to meet this problem. It gives drivers the joy of the full capabilities of the modern car without the expense of rapid tread wear. Used for normal motoring it offers a life expectancy considerably in excess of a conventional tyre and even when driven continuously at high speeds will outlast tyres of normal construction driven in the same way.

The Cinturato tyre is a combination of all that is best in tyre design - an internal fabric belt, built around an extremely strong,

lightweight carcass of plies set at right angles to the beads.

The combined actions of the breaker belt and the radial carcass ensure that the full width of the tread grips the ground at all times. Because the tread does not become deformed in the contact area the numerous grooves and sipes (knife cuts) are always open ensuring a uniform grip whether braking in the curve or on wet slippery surfaces; when cornering or rounding badly banked bends.

For the motorist who travels far and fast, in all weather conditions the Cinturato tyre has no equal and few rivals.

Two versions of the Cinturato are available: the Cinturato for speeds up to 130 mph, the Cinturato H.S. for speeds up to 150 mph.
